Heritage Dream

Beauty of Wood

We know that flooring is a very important part of your home, presenting and expressing your personality. That is why we are doing our best to help you choose the right floor for you.

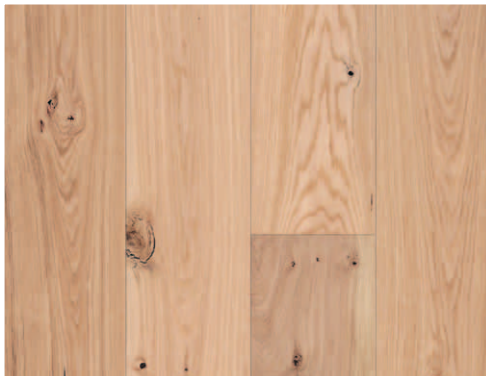

The quality of all residential and commercial areas mostly depends on the proper selection of flooring. In our sales programme you can find a little bit of everything for all kinds of characters; from cool and peaceful, warm and playful, joyful and cheerful, wild and bold, modern and traditional, rustic and antique, to rural and provincial.

The Heritage Dream collection found its inspiration in the natural beauty of 28 enticing islands throughout the world, the collection of which comprises 28 different types of oak parquet. Listen to your feelings and make a choice with taste and style.

Grade AB (natural):

Unique structure and colour, mistakes like small knots limited or not present, no cracks.

Grade CD (rustic):

Natural colour variations and sapwood allowed, knots up to 40 mm allowed, cracks filled with black or natural colour filler are limited in numbers.

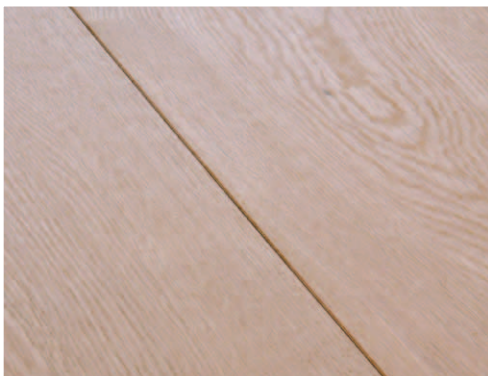

Grade DE (extra rustic):

All natural mistakes in wood allowed, unlimited numbers of cracks and knots filled (open or closed) with black or natural colour filler.

**FLOOR[®]
EXPERTS**

Smooth:

Surface is only sanded and coated with lacquer or oil. We didn't make any additional surface treatment, so you can see wood texture as it is in its own beauty.

Brushed:

We removed soft wood from surface with brush rollers, so only hard wood remained. Surface is now harder and more robust. Because of brushing, surface is also more resistant on scratches and impacts.

Sawn:

On surface we made sawn cut lines. With this special treatment we tried to imitate raw and unfinished sawn board. Surface is now rougher with special rustic look.

NOTE!

Lengths: 20% allowed shorter lengths.

Underfloor heating:

Not all flooring is suitable for underfloor heating. Due to a multi-layered composition of the Heritage Dream parquet flooring heat conduction is good and the flooring can easily be used on underfloor heating systems.

The images in this brochure are only indicative of the appearance you can achieve and the floor may look different to the samples. Consequently, we suggest you visit your supplier to view the larger display boards which will give a better indication.
