Original.

LAMINATE FLOORING

Made in Germany

The background image shows a bright, modern interior. A large window on the right side offers a view of a city skyline. In the foreground, there is a stack of books on a dark table. A tall, thin potted plant is visible on the right. The floor is covered in light-colored wood-look laminate flooring with a natural wood grain pattern.

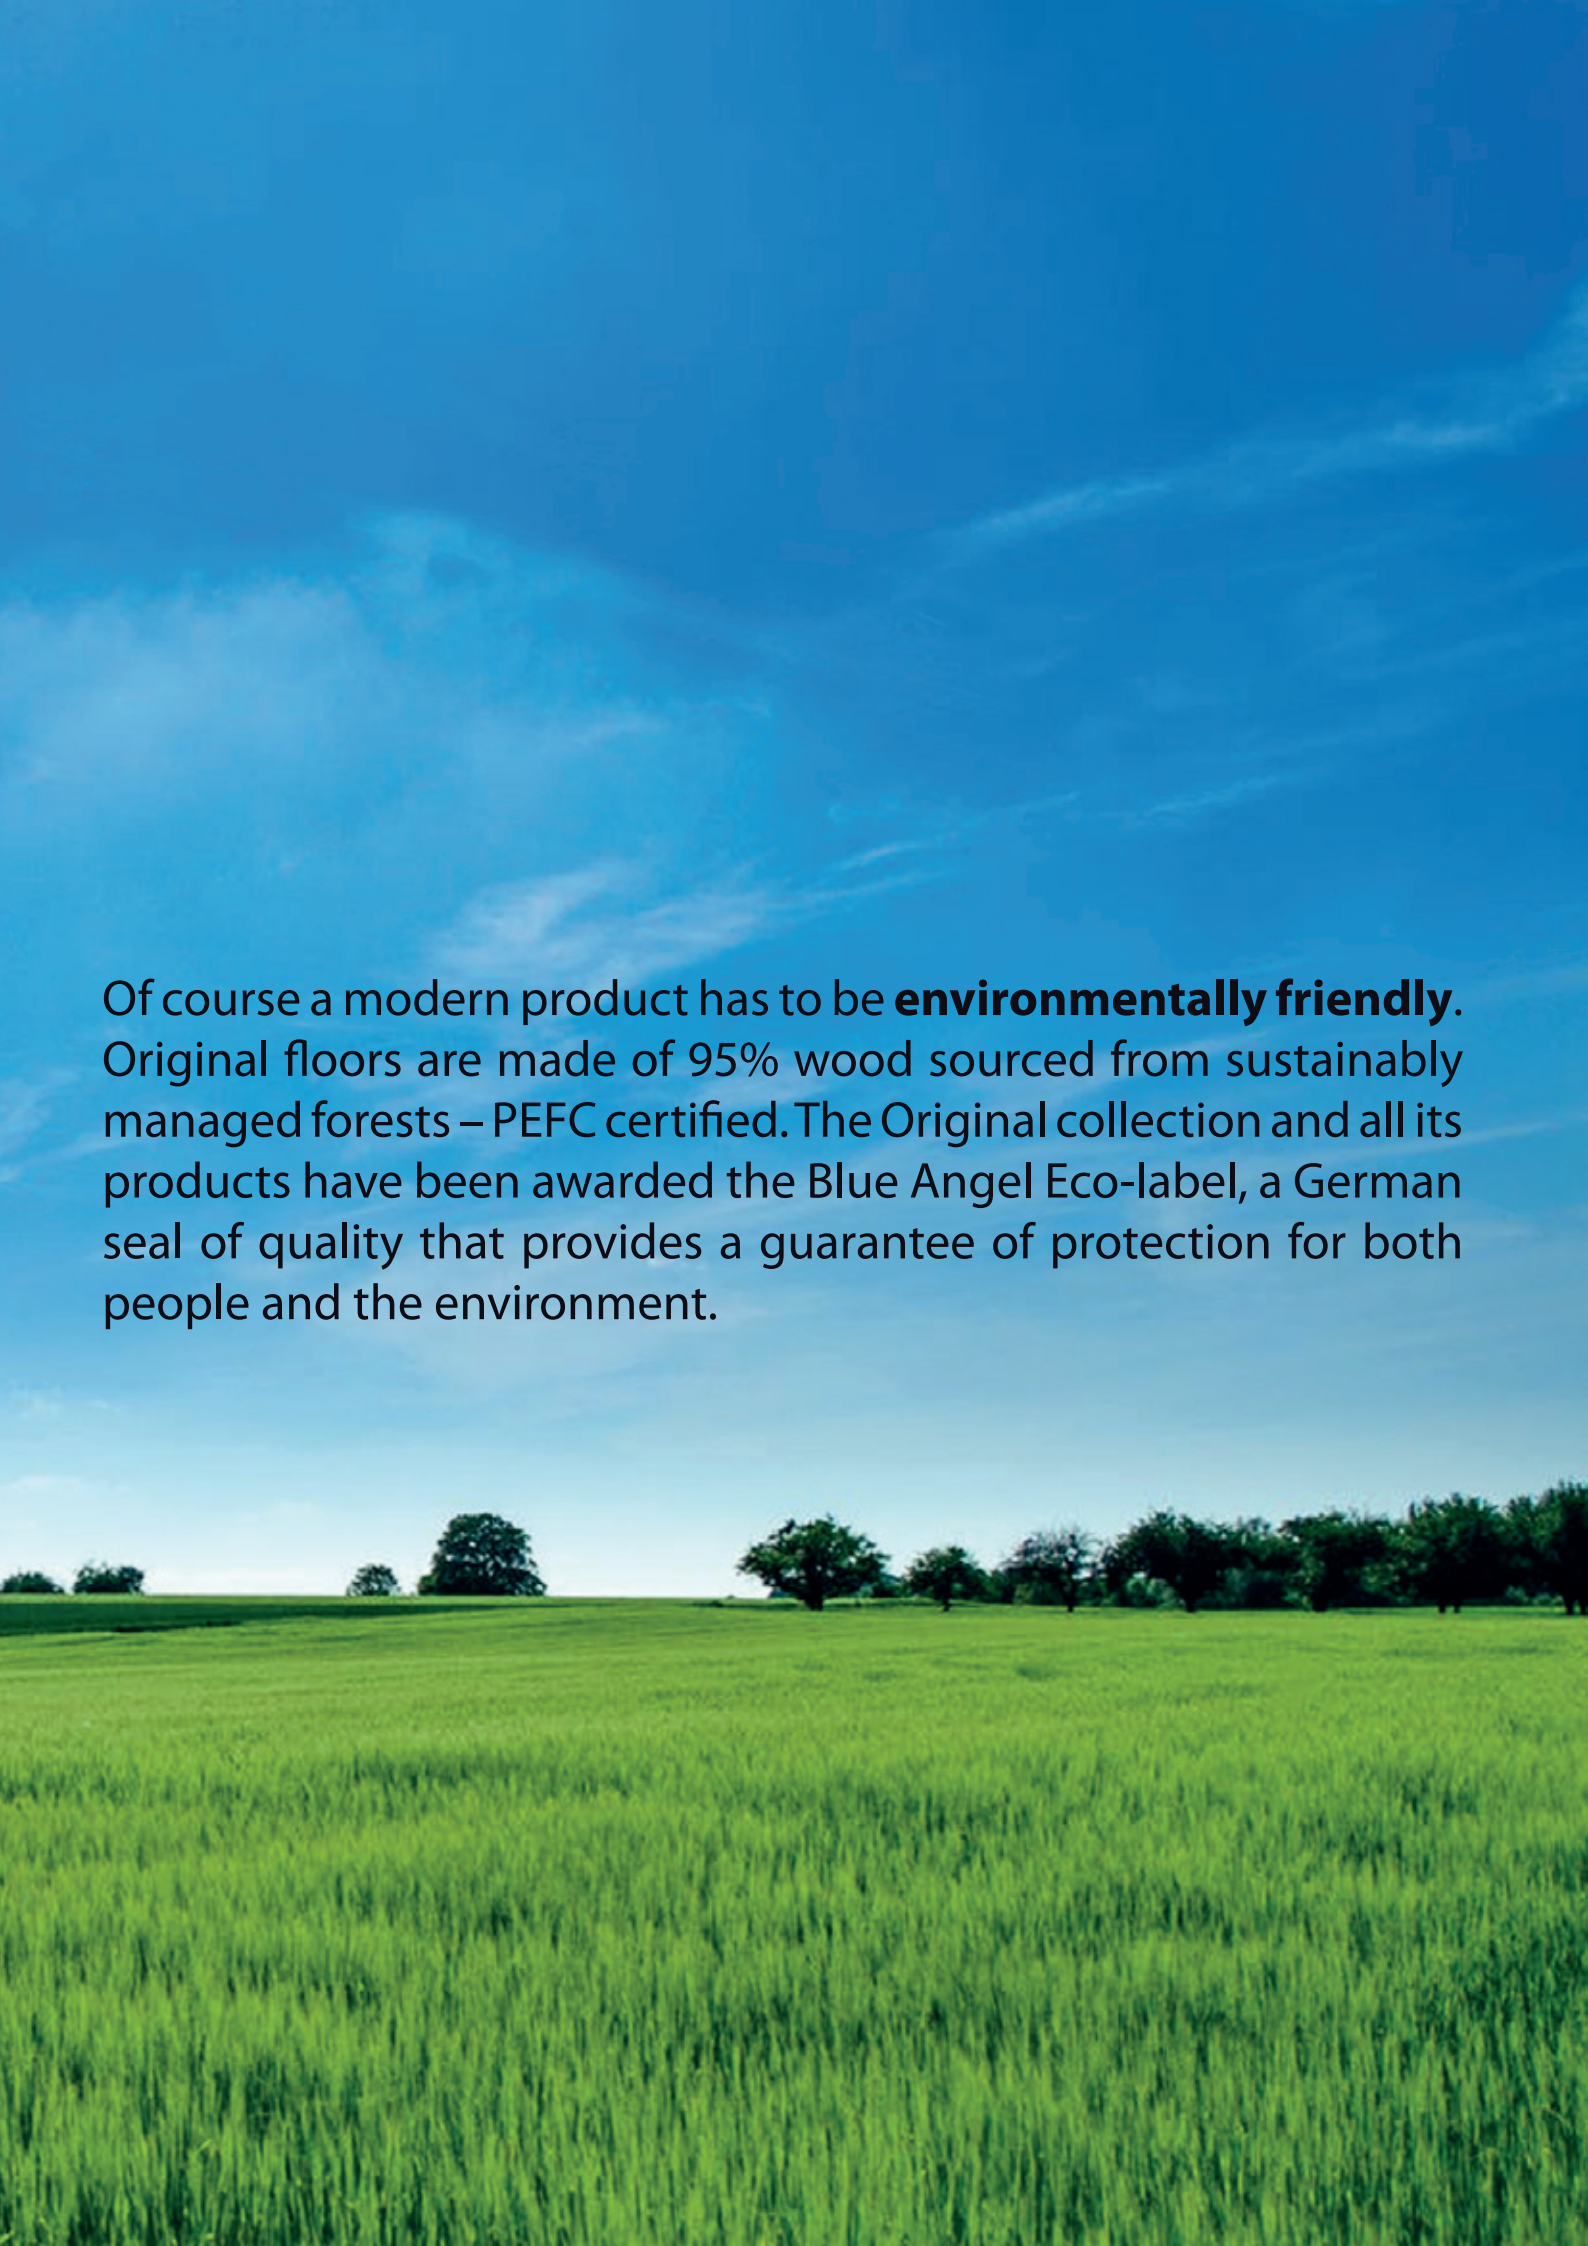

At Floor Experts we have a real passion for floors. We carefully observe fashions and trends in interior design and also listen to the practical needs of today's generation when it comes to decorating their homes, premises and even public spaces. The result of this process is a new collection of laminate floors called **Original**.

With more than **100 different possibilities** it represents the perfect choice and we can offer a wide variety of different thicknesses, dimensions, surface qualities and most important of all – decors (colours).

Decors are **carefully chosen** to fit any imagination and any preference as to how a floor should look. Some of our surface reproductions have such an incredible look and feel that they could easily compete with any premium quality wooden flooring. The deep brushing process for some products really creates a state-of-the-art surface.

Since we know the appearance the look is very important, but that is not enough, we have also added quality attributes to the product, such as an **antibacterial coating** that inhibits bacteria growth, enhanced scratch resistance, high quality HDF boarding with stain and imprint resistance providing highly robust and durable surfaces. These are just some of the aspects from this collection which will stand the test.

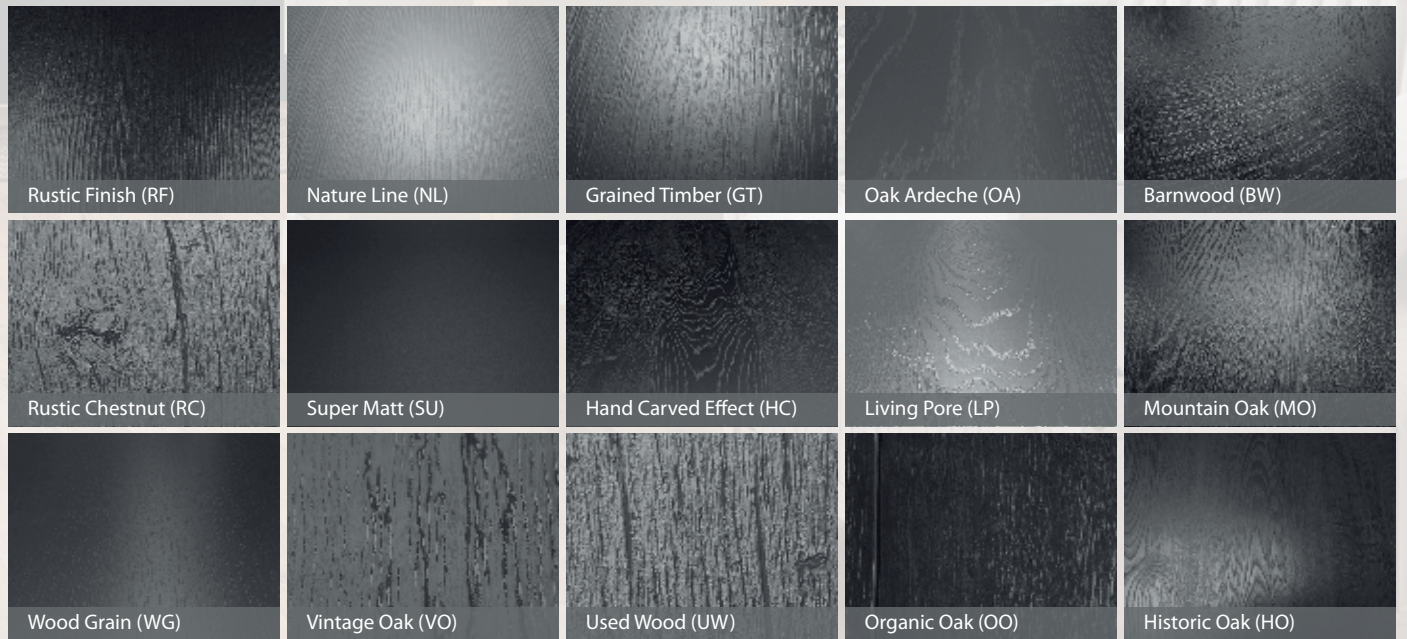

Of course a modern product has to be **environmentally friendly**. Original floors are made of 95% wood sourced from sustainably managed forests – PEFC certified. The Original collection and all its products have been awarded the Blue Angel Eco-label, a German seal of quality that provides a guarantee of protection for both people and the environment.
