DESIGNER SERIES

DESIGNER is the latest series of decorative panels by FORM AT WOOD, based on patterns created by recognized artists of world design. The concept of bringing the DESIGNER series to life is based on the effect of combining the original visions of independent designers and the technological know-how of the FORM AT WOOD company. The result of the cooperation is a unique product series, dedicated to lovers of original style, enthusiasts of applied art signed with the names of contemporary designers and fans of the highest precision of workmanship and care for even the smallest detail.

The first child of this idea is the IMPRESSIONS model, which awakens the imagination and stimulates all the senses. The unique 3D panel was created in cooperation with a living legend of international design, as the pattern was designed by Karim Rashid himself.

IMPRESSIONS

COLLECTION DESIGNED BY KARIM RASHID

"The subtle thumb-like impressions were inspired by painters techniques - treating the wood as if it is liquid paint leaving impressions that are painterly organic imprints. The three dimensional concave indentations can be reconfigured in many variations to create walls that have depth and texture, playing with light and shadow to give greater depth and dimension to our spaces."

Karim
